Introduction: Human Heredity in the Twentieth Century – <i>Bernd Gausemeier, Staffan Müller-Wille and Edmund Ramsden</i>	1
Part I: Constructing Surveys of Heredity	
1 Borderlands of Heredity: The Debate about Hereditary Susceptibility to Tuberculosis, 1882–1945 – <i>Bernd Gausemeier</i>	13
2 Championing a US Clinic for Human Heredity: Pre-War Concepts and Post-War Constructs – <i>Philip K. Wilson</i>	27
3 Remodelling the Boundaries of Normality: Lionel S. Penrose and Population Surveys of Mental Ability – <i>Edmund Ramsden</i>	39
Part II: Blood and Populations	
4 From ‘Races’ to ‘Isolates’ and ‘Endogamous Communities’: Human Genetics and the Notion of Human Diversity in the 1950s – <i>Veronika Lipphardt</i>	55
5 Between the Transfusion Services and Blood Group Research: Human Genetics in Britain during World War II – <i>Jenny Bangham</i>	69
6 The Abandonment of Race: Researching Human Diversity in Switzerland, 1944–56 – <i>Pascal Germann</i>	85
7 Post-War and Post-Revolution: Medical Genetics and Social Anthropology in Mexico, 1945–70 – <i>Edna Suárez-Díaz and Ana Barahona</i>	101
Part III: Human Heredity in the Laboratory	
8 From Agriculture to Genomics: The Animal Side of Human Genetics and the Organization of Model Organisms in the Longue Durée – <i>Alexander von Schwerin</i>	113
9 Cereals, Chromosomes and Colchicine: Crop Varieties at the Estación Experimental Aula Dei and Human Cytogenetics, 1948–58 – <i>María Jesús Santosmases</i>	127

10 Putting Human Genetics on a Solid Basis: Human Chromosome Research, 1950s–1970s – <i>Soraya de Chadarevian</i>	141
Part IV: Understanding and Managing Disease	
11 The Disappearance of the Concept of Anticipation in the Post-War World – <i>Judith E. Friedman</i>	153
12 ‘The Most Hereditary of All Diseases’: Haemophilia and the Utility of Genetics for Haematology, 1930–70 – <i>Stephen Pemberton</i>	165
13 How PKU Became a Genetic Disease – <i>Diane B. Paul</i>	179
Part V: Reconstructing Discipline(s)	
14 The Emergence of Genetic Counselling in the Federal Republic of Germany: Continuity and Change in the Narratives of Human Geneticists, c. 1968–80 – <i>Anne Cottebrune</i>	193
15 Performing Anger: H. J. Muller, James V. Neel and Radiation Risk – <i>Susan Lindee</i>	205
16 The Struggle for Authority over Italian Genetics: The Ninth International Congress of Genetics in Bellagio, 1948–53 – <i>Francesco Cassata</i>	217
